Hi Emily --

My daughter attended the first week of the Positive Choices Camp this summer, and I wanted to give you some feedback on the time she spent there.

Ever since she came home, she has been like a new kid! She took the camp very seriously and obviously gained a lot of personal insight during her time there. We've been watching her for the past month since she has been home, and we see her continue to grow and approach her life and her family in a kind, thoughtful, respectful way. The best part of all is to see how happy and at peace she seems to be with herself. She has also finally opened herself back up to us and is once again an active participant in our family. For that we are so grateful!

We have known Camp Director Terri Carter for the past five years, and I cannot think of a better person to have as a leader for this camp. When it comes to children and teenagers, she truly has a gift that I've never seen in another educator. Her depth of caring for children is remarkable and she gives of herself to kids without effort or hesitation.

Anyway -- I just wanted to let you know how much the camp meant to our family and how much we appreciate you offering this program for teens at such a critical time in their lives.

Take care,
(Camp Participant Parent)
